Preventative Maintenance

It is that time of year when jackets get heavier and the Heat replaces the AC in your home and car. It's also the time of year when your vehicle needs to be ready for winter. The last thing you want is to be stuck in the cold. Your vehicle needs to be safe and dependable. The stakes are higher in the winter when it comes to declining recommended services and repairs.

There are some specific things that we need to do to keep our vehicle ready for winter. Here are a few of the important items to consider:

*The First thing is to have your antifreeze checked. If the antifreeze protection is not set correctly your engine may not be protected and your radiator or hoses could freeze. If your heat doesn't seem to work, check your antifreeze level. It may be low, or there could be a thermostat problem. Get it checked! Now is the perfect time of year for a cooling system service.

*In the cold months we always worry about being able to brake in time. A comprehensive brake inspection will reveal if the pads, rotors or any other key parts need to be replaced. Also, have your brake fluid checked. It can accumulate water over time, which can really mess with your ability to stop in the winter.

*Have your battery tested! A battery's power really declines with the temperature. If your battery is weak in the fall, it may not work in the winter.

*It is also a good idea to replace your windshield wipers before any winter storms. Be sure to have enough windshield washer fluid.

*The final thing you should consider? Your tires! Tires lose pressure over time – up to one pound every six to eight weeks. For every 10 degrees the temperature drops you lose another pound of pressure. So, if it was 70 degrees when you last checked your tire pressure and now it is 30, you could be down FIVE pounds of pressure. That can be a real safety issue & also wastes gas. You may need special winter tires as well. Ask for help to find out the right tire design for your expected road conditions.

Contact us for a complete inspection on these winter items or for advice on other service repairs.

Holiday Special!

WINTERIZE Your Car **\$54.95**

Fall is here, and it is time to start thinking about winterizing your car. Wintertime is very unfriendly to a vehicle. Potholes damage wheels and tires. Salt causes rust and gravel pits the paint. Let us get your car ready for winter. We will check your heating and cooling system under pressure to make sure there are no leaks & check the thermostat to make sure it attains the right temperature (so the heater keeps you warm). Also, we will clean your battery connections and test the battery to assure that you start on the coldest mornings, check the charging system, and do our 31-point Preventive Maintenance Inspection, inspecting your tires, brakes, suspension, drive train, etc.

Two for One Makes 20/20

Buy One, Get One **FREE** on NAPA Wiper Blades when we replace your blades with any qualifying NAPA Blades at participating NAPA AutoCare Centers.*

*Ask your Service Advisor for details.

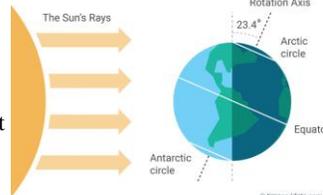

OFFER VALID Nov. 1 – Dec. 31, 2018

Winter Begins-Winter Solstice

The winter solstice marks the shortest day of the year in terms of hours of daylight. However, the solstice is a signal of more daylight to come in the following days, and it's one of the origins of the modern winter holidays.

The winter solstice 2018 will be on Friday, Dec. 21. In the Southern Hemisphere, that day is the summer solstice and the longest day of the year. The solstice marks the moment the sun shines at its most southern point, directly over the Tropic of Capricorn. Since Earth is tilted on its axis by 23.5 degrees, the Northern and Southern hemispheres trade places in receiving the sun's light and warmth most directly. The tilt of the Earth – not our distance from the sun – is what causes winter and summer.

Important Dates

- Nov. 4th Daylight Saving Ends
- Nov. 6th Election Day
- Nov. 11th Veterans Day
- Nov. 22nd Thanksgiving
- Dec. 2nd Hanukkah
- Dec. 7th Pearl Harbor Remembrance
- Dec. 21st Winter Begins
